## About Us:

Scribe Stock Counting Accountants LLC (Scribecounters) is an innovative provider of advanced inventory management services in the Middle East. We specialize in offering comprehensive stock-taking, asset tagging, infrastructural tagging and asset management solutions that are custom-tailored to the unique needs of each of our clients. Headquartered in Dubai, Scribecounters has developed a strong presence in the UAE and Oman, with expansion plans geared towards Saudi Arabia and Qatar.

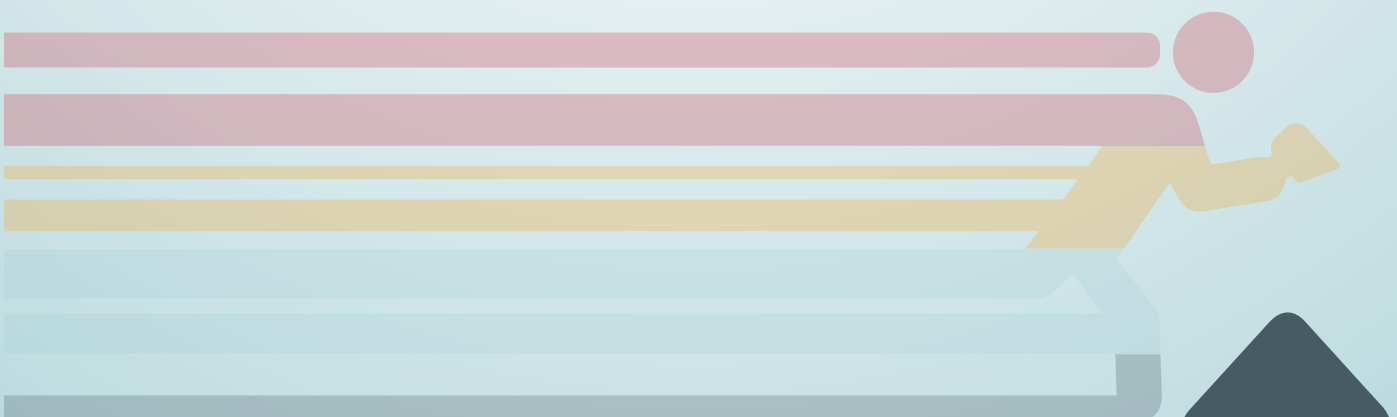

## Vision:

Our vision is to be the region's leading provider of inventory and asset management services, renowned for our unparalleled accuracy, high-tech methodologies, and customer-centric approach.

## Mission:

Our mission is to revolutionize inventory management through our unique **Count | Tag | Verify**

model, empowering businesses to efficiently and accurately track, manage, and strategize their asset utilization, without disrupting their regular operations.

# OUR SERVICES

## INFRASTRUCTURE TAGGING

Tag roads, tunnels and bridges

## ASSET TAGGING

Barcoding for inventory & fixed assets.

## PERIODIC STOCKTAKE

Perpetual and annual counts.

## STOCK COUNT ON ACQUISITIONS

A third-party count implies an unbiased and impartial valuation.

## STATUTORY AUDIT COUNT

Well-trained staff and technology offer ideal support for an audit.

## TURNKEY INVENTORY SOLUTIONS

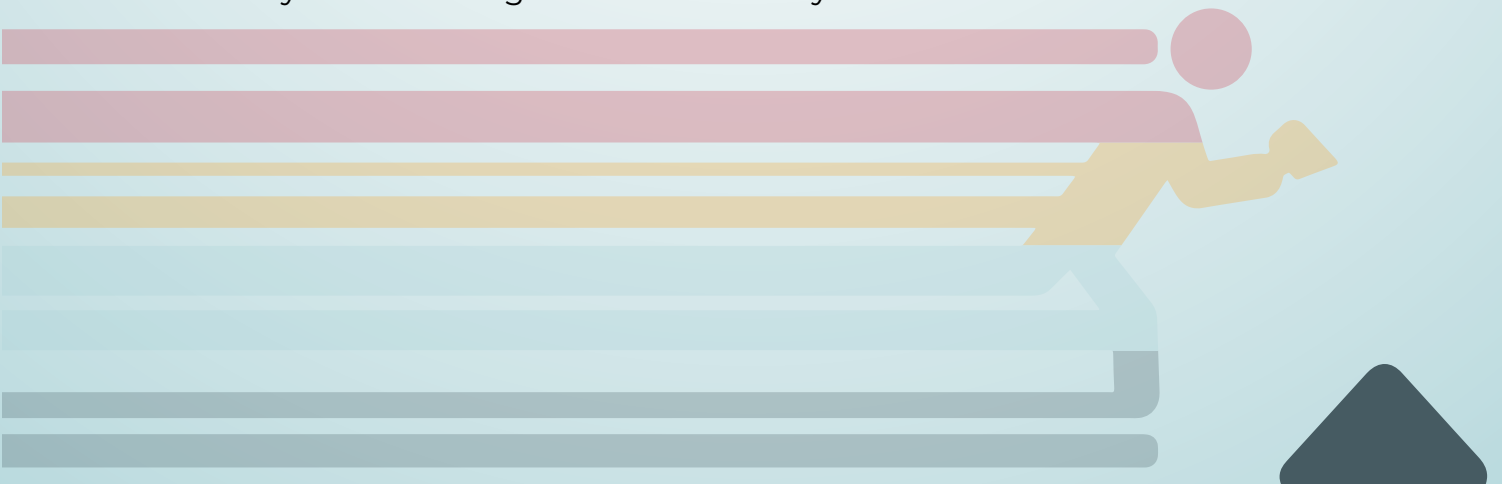

Organizing, locating, and identifying damaged or expired.

## GOLD INVENTORY COUNT

We perform the counting of gold in the manufacturing, retail, wholesale, and bullion industries.

Our services' proficiency is underpinned by our commitment to delivering the most accurate data in the most cost-efficient manner possible. Be it enterprise-level operations or large-scale government infrastructure projects, Scribecounters is your trusted partner for all your inventory and asset management needs.

- 1.Asset Identification and Counting:** We help identify and quantify all your physical assets, creating a comprehensive inventory.
- 2.Asset Tagging and Verification:** We tag assets for easy identification and tracking, then verify the physical presence and condition of these assets.
- 3.Asset Valuation Services:** We provide professional asset valuation services, helping you understand the current market value of your assets.
- 4.Asset Lifecycle Management:** We provide guidance on managing assets throughout their lifecycle, from acquisition to disposal.
- 5.Asset Policies and Procedures:** We help establish effective policies and procedures to manage assets effectively.
- 6.Asset Management Compliance:** We ensure your asset management is in alignment with environmental policies and sustainable development goals.
- 7.Business Process Re-engineering:** We offer professional consulting services to evaluate and restructure your department, introducing policies and systems to perform at an international level.
- 8.Training and Upskilling:** As part of the transformation, we provide necessary training and upskilling to your staff to ensure they are equipped to manage the newly implemented systems and procedures.
- 9.Climate Goals Alignment:** We make sure that your asset management strategies align with the broader climate goals of the government and the nation.
- 10.Asset Survey and Survey Tools:** We ensure that your asset strategies are aligned with your business goals and detect any deviations at the earliest.

# INFRASTRUCTURE ASSET TAGGING

At **Scribe Stock Counters**, we offer an array of specialized services tailored to support government entities in their infrastructure management. We employ state-of-the-art technology, including machine learning, computer vision, and satellite imagery to identify, count, and geotag a range of infrastructural assets. Here's a detailed look at our services:

## ROADS

We leverage dash-camera videos and high-quality satellite images to detect and geotag elements like lanes, road lengths, and street lamps. Our technology integrates AI-powered machine learning and computer vision to provide you with precise data. Moreover, we integrate our data with the Pavement Management System (PMS) to help you understand and manage the lifecycle of your road assets. Our experts guide you in devising and implementing effective maintenance SOPs (Standard Operating Procedures) and SLAs that align with your government's sustainability and climate compliance goals.

## TUNNELS

Our services extend to identifying, counting, and geotagging tunnels as part of your infrastructure. We utilize high-quality dash camera footage and satellite images to provide you with accurate data about your tunnel assets.

## BRIDGES

We detect and geotag bridges within your infrastructure, marking them as valuable assets. We also integrate our data with the Bridge Management System (BMS), helping you maximize the asset lifecycle by implementing internationally recognized best practices.

## BUILDINGS

Our services cover end-to-end asset identification, tagging, and reconciliation for buildings as infrastructural assets. Additionally, we assist you in creating a comprehensive Fixed Assets Register (FAR) that includes both movable and immovable assets above a certain value. Our professionals ensure that every asset is accurately logged and accounted for, helping you maintain an up-to-date and reliable asset inventory.

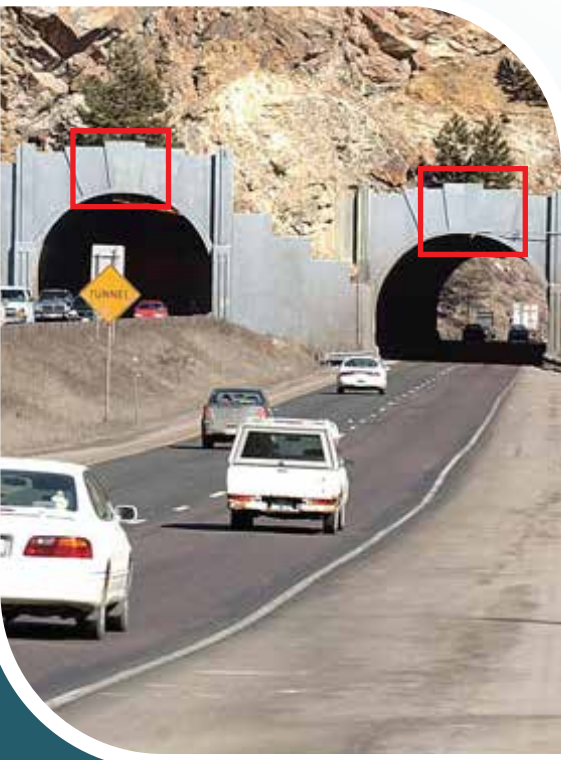

At **Scribe counters**, we understand the complexity of managing large-scale infrastructural assets. Our blend of technological expertise and industry knowledge positions us ideally to help government entities effectively manage their assets, aligning their practices with sustainability goals and optimizing the lifespan of their infrastructure.

**BRIDGES**

**TUNNELS**

**BUILDINGS**

# Tag Assets That Matters

Rather than tagging all the assets and adding them to a register, the right approach would be to build a Master Asset Register that contains their condition and usability, irrespective of tagging. A key advantage of using an asset tagging system is that you can ensure the right tags are chosen to collect data on the physical assets of a business.

A business must have an accurate fixed asset record for making informed business decisions. Our team provides asset tagging services from preparing an asset register to managing it regularly by tracking the movement of assets.

A person's arm and hand are shown holding a black handheld barcode scanner. The person is wearing a dark grey long-sleeved shirt with a green reflective stripe on the sleeve. The background is a blurred grocery store aisle with shelves of products. A large red rectangular overlay is positioned over the top half of the image, containing white text.

## Count-Tag-Verify a Scribe Strategy

Our Man to Man strategy is to Count first. Teamwork to decide assets for physical tagging and then verification

# INVENTORY COUNTING BENEFITS

---

# Gold Inventory Count

**01** Independence

Zero Downtime **02**

**03** Big Savings

Unbiased Results **04**
